---

## Professional Summary

Software Developer with hands-on experience in designing, developing, and optimizing scalable enterprise applications using **ASP.NET Core, Web API, C#, and Microsoft SQL Server**. Proven ability to improve application performance, automate business logic, and build maintainable, service-oriented solutions. Familiar with **Microsoft Azure fundamentals, cloud-ready architecture, RESTful services, and data-driven development**. Strong collaborator with an agile mindset, focused on delivering reliable, high-quality software aligned with Microsoft engineering standards.

---

## Technical Skills

### Programming & Frameworks

C#, ASP.NET MVC, ASP.NET Core Web API, RESTful Services, Web Forms

### Cloud & Microsoft Technologies

Microsoft Azure (fundamentals), Azure-ready application architecture, cloud scalability concepts, modern workplace technologies (Microsoft ecosystem)

### Databases & Data

Microsoft SQL Server, Entity Framework Core, query optimization, data modeling, transactional data handling

### Performance & Automation

Application performance optimization, debugging, code refactoring, automation of business workflows, scalable system design

### Frontend & UI

HTML, CSS, Bootstrap, jQuery, Telerik UI

### Tools & Methodologies

Visual Studio, GitHub, Jira, Agile/Scrum, CI-friendly development practices

---

## Professional Experience

### Software Developer (.NET)

**Concept Infoway Pvt. Ltd., Ahmedabad**

*January 2024 – Present*

- Designed, developed, and enhanced enterprise-level applications using **ASP.NET MVC, C#, SQL Server, and jQuery**, following clean and maintainable architecture principles.
  - Built and maintained **RESTful Web APIs** to support modular, service-oriented application design suitable for cloud deployment.
  - Resolved **20+ Jira issues per month**, applying strong debugging and root-cause analysis to ensure system reliability.
  - Optimized SQL queries and application logic, achieving approximately **14% performance improvement** through efficient data access and code refactoring.
  - Collaborated with cross-functional teams (QA, UI/UX, backend) in an **Agile environment** to deliver high-quality, scalable solutions.
  - Participated in client requirement discussions, technical feasibility analysis, and solution design aligned with business and performance goals.
- 

## Projects

### Task Management System (ASP.NET Core Web API)

- Developed a **scalable Task Management System** using ASP.NET Core Web API with secure CRUD operations.
- Implemented **Entity Framework Core and Microsoft SQL Server** using layered architecture to ensure maintainability and high performance.
- Designed APIs following REST standards, enabling future **cloud-based deployment and scalability**.

### Employee Management System (.NET MVC)

- Built a full-featured Employee Management System using **ASP.NET MVC**, applying MVC design principles for clean separation of concerns.
- Streamlined task allocation, tracking, and reporting workflows to improve operational efficiency.
- Focused on maintainability, scalability, and performance optimization.

### Full-Fledged Registration Module (.NET, 3-Tier Architecture)

- Designed and implemented a complete registration module using **.NET and jQuery** with a **3-tier architecture**.
  - Ensured clean separation of presentation, business logic, and data access layers for reusability and scalability.
  - Applied validation and secure data-handling practices.
-

## Education

### **Master of Computer Applications (MCA)**

Biju Patnaik University of Technology (BPUT), Odisha  
2022 – 2024 | CGPA: 8.45

### **Bachelor of Science in Physics**

Utkal University, Odisha  
2019 – 2022 | CGPA: 8.88

---

## Additional Highlights

- Strong foundation in **data structures, object-oriented programming, and software engineering principles.**
- Experience building applications aligned with **cloud-ready and scalable system design.**
- Continuous learner with interest in **Microsoft Azure, cloud services, and modern enterprise technologies.**
